

# TRANSFER ACTION CAUCUS

## MEMO:

This week's recommendations came from our **Policies** group. Their recommendations focused on:

- Articulations
- Prior Learning
- Procedures and Processes
- Intercampus Transfer

## WHAT HAPPENED?

In this week's meeting the policies committee developed the following recommendations:

- Establish separate website to respond to prior learning and display all information in one place.
- Continue to improve processing of undistributed courses and identifying best practices for review among campuses.
- Consider prior learning credit and assessment as all credit earned/learned before attending an IU campus.
- Develop a process for evaluation of credits (and rules) which value advisor-input.
- Establish a mini caucus to examine intercampus transfer infrastructure. Goal is to identify and addresses the unique challenges facing enrollment and movement of students.

We appreciate your efforts in getting the benchmarking and measuring surveys completed. We are excited to share the findings and recommendations with the caucus.

## WHAT'S NEXT?

Data and Tracking will review their recommendations next week. As we get closer to the end of the caucus, it is important that we continue to support the process with active campus engagement.

The continuation of assessment of the current state of barriers within the campuses and utilization of strategic doing is imperative to student success.

Within the next two weeks, the recommendations from the caucus findings will be sent to the workgroups on the campus level.

## MAKE IT HAPPEN STEPS FOR LEADERS:

- Please prepare to support the campus representatives (in the upcoming weeks) as they engage with the workgroups to implement some of the recommendations provided by the caucus.
